

UV-modul dryer with roll transport

Application:

For the first time, Beltron developed a modularly expandable UV dryer with gentle roll transport for your products.

Design:

The machine can be equipped with 1, 2 or 3 UV lamps, for radiation from above, below or above and below. Specially developed for cross-linked through UV radiation for electrical industry (printed circuit boards from 0.1 mm thickness) with programmable PLC control, selective filters and quartz glass panes.

Technical Information UV-modul dryer with roll transport

Roll transport

Control: PLC control

Lamps: 1,2 or 3 UV lamps

Electrical supply: 400 V / 50 Hz / 3~

CE-Sign

The UV-modul dryer with roll transport are used successfully in:
printing industry, electronic industry, plastic industry, building materials industry, textile industry,
packaging industry, pharmaceutical industry, automotive industry, glass industry and engineering.

These are just a few examples from the various partner portfolio of Beltron.
